Tech Talent Analytics: Profiling the Modern Data Professional

A. The majority of respondents identify as Data Analysts (386), followed by Students, Data Engineers, Data Scientists, and Business Analysts. This paints a picture of an emerging, largely early-career data workforce.

B. The top 5 industries represented are Tech (150), Finance (98), Healthcare (85), Education (38), and Telecommunications (22) with Tech leading by a significant margin.

C. The average salary across all data professionals is \$53,000, ranging from as low as \$20,000 to as high as \$188,000 depending on role and location. Top earners are Data Scientists (~\$138K) and Senior Business Analysts (~\$116K), while Data Analysts average around \$76K.

D. Males earn slightly more than females across most countries. US-based professionals earn significantly higher salaries compared to their counterparts in other countries.

E. 59% of survey takers transitioned into tech from other fields, meaning the majority are career changers — not traditional CS graduates.

F. The most popular programming language is Python (67%), followed by R (16%) and SQL (8%).

G. Most respondents (269) rated entry difficulty as "neither easy nor difficult", but a notable portion found it difficult (156) — suggesting the path into data careers has real barriers.

H. The average salary satisfaction score is 4.3 out of 10 - indicating most professionals do not feel reasonably compensated.

I. The United States has the youngest average age among data professionals surveyed
